Certifications:

- DCA – CCI Computer Education.
- Python for Data Science – CognitiveClass
- Data Analysis with Python - CognitiveClass
- Java – HackerRank
- SQL(Intermediate) – HackerRank
- Unity Essentials – Unity

Technical Skills:

- Python •Pandas
- NumPy •SciKit-Learn
- API •Java •Power Bi
- HTML •SQL •CSS •JS
- Git & GitHub •MS-Office Tools •Advanced Excel

Soft Skills:

- Leadership
- Problem solving
- Adaptability
- Quick learner

Education:

AVS Engineering College

B. Tech (AI&DS) - CGPA: 8/10

GBHS Mecheri

HSC – Percentage: 73.8%

GBHS Mecheri

SSLC – Percentage: 75.6%

Languages:

- Tamil- Read, Write, Speak
- English- Read, Write, Speak
- Kannada - Speak

Objective:

I have an active interest in Artificial Intelligence, Data Analysis and Data Science, also built various projects in all three domains. I enjoy working on logic-driven projects and exploring the process of making interactive games. I am currently completing my final semester. Currently, I am open to internship and full-time job opportunities.

Internship:

Neura-AI Solutions Private Limited

Worked on machine learning models that enables systems to learn from data, identify patterns and make predictions or decisions without explicit programming.

LiveWire Software Training Institute

Used HTML, CSS and JavaScript for creating responsive websites and performed CRUD operations on MongoDB.

Project:

Cortex - AI Voice Assistant:

- Cortex is a cross-platform, privacy-focused AI voice assistant designed for desktop computers.
- Python, Faster-Whisper, NLU, NLP, TTS

Smart Banking Engine:

- Planned a 3-table relational banking schema (Customers, Accounts, Transactions) with cascading foreign keys.
- MySQL, Database Triggers, Window Functions, Risk Analytics

Global AI Workforce & Salary Insights Dashboard:

- Produced an enterprise-grade 3-page interactive Power BI report tracking global AI hiring volumes and compensation benchmarks.
- Power BI, DAX, Power Query (ETL), Star Schema, Data Modelling.

Game Zone Platform:

- This is not focused on games, instead it was primarily focused on the Backend connectivity with MongoDB and the CRUD operations.
- Web Dev, HTML/CSS, JS, MongoDB, Express, Node.

Gold Price Tracker:

- Fetches the current gold price from an API (Gold API), displays it on the web page, predicts future price
- Data Analysis, Python, Web API.
