

PRASANNA V

B.Tech · Artificial Intelligence & Data Science

v.p.infinix@gmail.com | linkedin.com/in/prasanna-v-dataanalyst | github.com/PrasannaV569

TECHNICAL SKILLS

Programming

Python · Java · C# · SQL

Databases

MySQL · MongoDB

Web

HTML · CSS · JavaScript

Tools

Git · GitHub · VS Code · Microsoft Excel · Power BI

AI Tools

Gemini · ChatGPT · Claude · Antigravity · Cursor

CERTIFICATIONS

- Python Basic — HackerRank
- Java Basic — HackerRank
- SQL Intermediate — HackerRank
- Unity Essentials — Unity Technologies
- DCA (MS Office Tools and Basic Hardware engineering) — CCI Computer Education

LANGUAGES

Tamil — Read, Write, Speak

English — Read, Write, Speak

Kannada — Speak

Japanese — (NAT-5Q)

STRENGTHS

- Team Leadership
- Analytical Thinking
- Problem-Solving
- Quick Learner
- Team Coordination

PROFESSIONAL SUMMARY

Final-year B. Tech (AI & DS) student with a CGPA of 8.0, passionate about Data Analysis and Artificial Intelligence. Delivered end-to-end projects in SQL database engineering and Power BI business intelligence, and led the development of an offline AI voice assistant as a team lead. Actively seeking Data Analyst or AI roles.

WORK EXPERIENCE

Intern — Machine Learning Intern

ABE Group of Companies | Aug 2024

- Applied supervised learning algorithms (classification & regression) using Scikit-Learn and Pandas for real-world datasets.
- Performed data preprocessing, feature engineering, and evaluated models using precision, recall, and F1-score.

Intern — Web Application Development

Livewire, Salem | Feb 2025

- Developed a user authentication system using Passport.js with session-based login/logout and MongoDB data management.
- Built and connected UI components to a Node.js/Express REST backend; executed full CRUD operations.

EDUCATION

B.Tech – Artificial Intelligence & Data Science

AVS Engineering College, Salem | 2026 – Present

CGPA: 8.0 / 10 (up to 7th Semester)

HSC (Class XII) & SSLC (Class X)

GBHS School, Mecheri | 2020 – 2022

HSC: 443/600 (73.8%) | SSLC: 378/500 (75.6%)

PROJECTS

Cortex — AI Voice Assistant (Team Lead)

Python · NLU · TTS · Faster-Whisper | Final Year Project

- ▶ 100% offline AI assistant with custom-trained NLU engine, real-time speech interruption, and a Knowledge Graph GUI.
- ▶ Built a Neural Sync automation module allowing users to draw and voice-command custom workflows — no cloud APIs used.

Smart Banking Engine

MySQL · Triggers · Window Functions | Data Analysis

- ▶ Designed a 3-table relational banking schema with triggers for overdraft protection and geo-velocity fraud detection.
- ▶ Used SQL Window Functions to compute real-time running ledger balances per account across all transactions.

Global AI Workforce & Salary Dashboard

Power BI · DAX · Star Schema · ETL | Data Analysis

- ▶ Built an interactive 3-page Power BI report with Star Schema, Many-to-Many bridge table, and Power Query ETL pipeline.
- ▶ Implemented Field Parameters for dynamic axis switching across 5 dimensions — targeted at CHROs and Tech Recruiters.

Gold Price Tracker & Predictor

Python · Flask · Machine Learning · REST API | Data Science

- ▶ Live gold price dashboard using Flask & Gold API; trained an ML model to predict next-day gold rate from historical data.
